

PIONEERING SMART ENERGY SOLUTIONS FOR A SUSTAINABLE FUTURE

Nebulae is an agile and futuristic IoT platform offering a smooth and seamless connection of devices across multi-band networks and mediums.

NEBULAE - AT A GLANCE

Nebulae, a business vertical of SLS, has developed an industry-grade product portfolio to tap India's emerging and developing Smart Metering market. Nebulae provides efficient turnkey solutions for various RF technologies, including LoRa, Wi-SUN, G3-PLC, SigFox, BLE, Zigbee, SubGHz, etc. Nebulae has designed dependable and secured hardware solutions ranging from Modules, Concentrator, EVK Kit, Gateways and DCUs, RF NIC Card, and AMR Devices. A cutting-edge software portfolio of Nebulae includes LNS, NMS, HES, and Mobile applications for utility management.

The "Brain" behind a seamless connection of devices across mutli-band networks

Features

ENTERPRISE-GRADE SECURITY

SCALABILITY

EASY AND FAST DEVELOPMENT

ZERO CONFIGURATION

NETWORK SERVICE

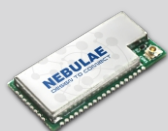

HARDWARE AGNOSTIC

A Data Acquisition Solution for Smart Meter

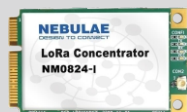

LoRaWAN Offerings

LoRa Module

LoRa EVK Kit

mini PCIe LoRa Concentrator Board

LoRa Concentrator Board

Water AMR

Gas AMR

LoRaWAN Gateway

Wi-SUN offerings

Wi-SUN Gateway

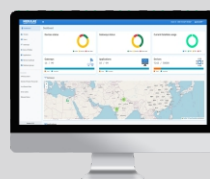

Wi-SUN Module

RF NIC Card

Software offerings

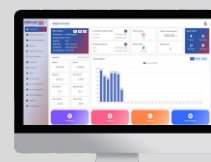

LoRaWAN Network Server

Network Management Server

About SLS

System Level Solutions, established in 2001, is a leading manufacturer and turnkey solution provider. With over 21+ years of expertise, SLS caters to businesses globally across multiple industries, including EV charging infrastructure, home and industrial automation, IoT-based solar, smart street lighting, FPGA & IP cores, and numerous testing facilities.

The team of 300+ in-house staff is currently working across 8+ business verticals, operating from bases in India, UK, and USA. Along with the Make-In-India initiative, the in-house design and manufacturing capabilities and strong research and development competencies enable SLS to deliver market-ready products that meet specific business requirements.
