

Cold Water IoT Meter

Model: PL1SLSIWMR100

The System Level Solutions (SLS) Cold Water IoT Meter is an intelligent device designed to accurately measure the flow of cold water through pipelines. Engineered for smart infrastructure, it seamlessly integrates into wireless remote metering systems, offering:

- Accurate Flow Measurement for residential and commercial use
- Remote Scheduled Data Reporting via IoT connectivity
- Low Power Consumption for extended battery life and reduced maintenance
- Strong Anti-Interference Performance ensuring stable operation in noisy environments
- User-Friendly Operation, designed with simplicity and reliability in mind

Ideal for smart cities and utility providers, this solution enhances efficiency in water management and billing through automated, wireless data collection.

Technical Parameters

Nominal Diameter (DN)	15mm	20mm
Common Flow (Q3) (m³/h)	2.5	4
Boundary Flow (Q2) (m³/h)	0.04	0.064
Minimum Flow (Q1) (m³/h)	0.025	0.04
Overload Flow (Q4) (m³/h)	3.125	5
Least Count	0.0001 m³ or 0.1 Liter	
Full-Scale Reading	99999.9999 m³	
The Smallest Unit Data	0.01 m³ or 10 Liter	
Working Temperature	0.1°C ~ 30°C	
Working Power Supply	3.6V Lithium Battery Pack	
Environmental Temperature Range	-25°C ~ 70°C	
Communication Mode	LoRA or WiSUN or LTE CAT1 bis	
Maximum Working Pressure	1.0MPa	
Margin of Error	Q1<=Q<Q2 error<=±5%; Q2<=Q<=Q4 error<=±2%	
Loss of Pressure Rating	Δp63	
Class of Accuracy	Level 2	
Flow Profile Sensitivity Level	U10, D5	
Standard	ISO4064	
Climate and Mechanical Environment Safety Level	B	
Electromagnetic Compatibility Rating	E1	
Battery Life	5 years or optional 10 years
