

WATER METER SOLUTION

Measure better. Manage smarter. Save more.

About SLS

WE ARE A

————— Product & Service Company

INTO

————— Hardware & Software

ESTABLISHED AS

————— Turnkey Solution Provider

Quick Facts

100+
active projects across the globe

300+
in-house staff

20
years and counting

- No of business verticals : 6+
- Operating Base: India, UK, USA
- No of manufacturing plants : 1
- In-house Design & Manufacturing Capability
- Part of Make-In-India initiative

Ecosystem:

Device Layer → Network Layer → Application Layer → User Interface

Products

Water Meter AMR

- 💧 Automatic Meter Reading (AMR)
- 💧 Real-Time Consumption Monitoring
- 💧 Abnormal Usage Detection & Tamper Alerts

LoRaWAN Gateway

- 💧 Long-range Communication
- 💧 Secure Data Transmission
- 💧 Connects Multiple Meter

HES - IoT Platform

- 💧 Device & Meter Monitoring
- 💧 Consumption Analytics
- 💧 System Management

The LoRa-based Smart Water Meter enables utilities and municipalities to transform traditional water metering into a connected, intelligent, and data-driven system. Designed for modern smart city infrastructure, it delivers accurate, real-time consumption data without the need for manual meter reading.

Powered by low-power, long-range LoRa communication, the meter ensures reliable data transmission across wide urban and rural areas while operating for years on a single battery. This significantly reduces maintenance effort, field visits, and total operational costs.

Applications:

- 💧 Residential Apartments
- 💧 Smart City Projects
- 💧 Commercial Complexes
- 💧 Municipal Water Supply
- 💧 Industrial Facilities

Key Highlights:

- 💧 Long-range, low-power LoRa connectivity for scalable deployments
- 💧 Automatic, accurate meter reading—no manual intervention
- 💧 Real-time water usage monitoring via centralized platform
- 💧 Secure wireless data transfer to servers, dashboards & apps
- 💧 Seamless integration with HES for efficient data management

Features:

ISO 4064

Server Based

Remote Monitoring

Leakage Alerts

Rugged and
Weather-Resistant

High Measurement
Accuracy

Smart Water Meter Advantages:

Encourages Citizen Engagement Through the Mobile App

Gives households clear insight into their water consumption, helping them manage usage responsibly & support environmental sustainability

Supports Long-Term, Low-Maintenance Operation

Long battery life reduces field visits and service disruptions

Enhanced Billing Transparency

Accurate, transparent billing empowers utilities to improve ROI while strengthening customer trust

Efficient Maintenance with Smart Data

Long battery life reduces field visits and service disruptions

Head End System (HES):

Head End System Advantages:

Enables Better Resource Planning

Usage trends and alerts help authorities manage water distribution, & improve long-term planning.

Centralized Visibility for All Meters

Provides a single dashboard for officials to monitor consumption, system health & alerts

Enhances Transparency and Billing Accuracy

Automated data reduces billing disputes and strengthens public trust through accurate, timely metering.

Improves Public Service Responsiveness

Faster detection of leaks, tampering, or supply issues enables quicker action and reduces wastage.
